

SODOM AND GOMORRAH OF THESE TIMES

John Rick Miller

MISSION
FOR THE LOVE OF
GOD WORLDWIDE

There was a society just like us, in those times, they were cosmopolitan, they were prosperous, they married, they had families, they believed, and then suddenly one day somebody opened a door that the people knew was wrong, but the people forgot to close that door, they forgot to stand up and say, “NO, this is not of God, it does not belong in my home, it does not belong in my community, in my city, in my country”.

Somebody forgot to stand up and marriages began to collapse and then adultery came and adultery became so common that it became commonplace and the families were destroyed. But then adultery was not enough and they took the next jump and the door was opened to perversion... but perversion being what it is, it is never enough and it had to become more perverse. And God sent his mouthpieces, and the people of this society threatened to kill them, they wouldn't listen until the day came when not even ten good men could be found...

At that time there were over 300,000 men in this one place. But it is this whole valley with all the small towns that was infected by the lifestyle of this people. All of those people were infected by the same perverseness and the destruction of the family, until the day that they became an abomination to God. The patience of God ended; and in a flash of light within seconds the entire valley was gone.

Pope John Paul II for many years tried to tell us in his talks, because he kept referring to this place. He called it the pile of rubble, because you can go there today and see this pile of rubble. For as long as you can see, as far as you can see, nothing grows, only snakes and scorpions. But there is a wind that blows through this valley constantly and it is the most eerie wind you will ever feel, you will ever hear in this cursed place of Sodom and Gomorrah. And we my dear friends, are worse in these times, because we have added abortion to our list of sins.

Pope John Paul II said that we are at a crossroads as mankind; we can turn this way and together, we can create paradise again, together we can build a garden on earth or we can remain silent and together reduce this place to a pile of rubble. Sodom and Gomorrah...
