

THE ARMED FORCES

JOHN RICK MILLER

**MISSION**  
FOR THE LOVE OF  
GOD WORLDWIDE

Every Navy in every country that this Mission is in has consecrated. The navy... the Navy is very special, the heart in protecting the Nation... they are very special, they are men of faith and in every country it has been consecrated.

We have many governors, many mayors, congressmen that have said: 'No, you cannot remove God from politics, never mind religion...God'.

You cannot separate God, because a politician is a child of God, so how can you do it? And by the Grace of God, more and more people: police, the federal police, the local police are consecrating. The politicians are consecrating... now the politicians are saying: 'perhaps we have to rethink this' and they are consecrating... state, by state, by state. And once they do and everyone comes together, then we can show the world the place of Mexico in the world, according to the Plan of God.

So, if you would consider the consecration of the Navy like all the other countries, it would be a big celebration... it would be a whole day of celebration... and that is the correct word.

We are afraid because we don't have that relationship with God as we should to give us that strength to see the way, to say NO, and to take our children and love them and teach them. Nothing can defeat that...nothing...

They are the true keepers of the justice, the right and what is good for the people. If the government goes crazy, it is the military that have the sovereign right to protect the people... and somehow that knowledge of the reason for the military has gone from us in these times.

We only think of the military in terms of exterior...we forget that the real core of the military is to protect its people. So that's their democracy, but also their faith.

So, I expected the general who reports to the president, yes... maybe...instead, God touched his heart; and I could see the tears and he said: ' I don't know why this is happening, but I promise you I am going to consecrate all the armed forces...' and he kept his word publicly. He is no longer the General, but it doesn't matter, his reward in Heaven will be great... but the point is, the military is very important for a country.
